

MACAO EAST ZONE (design of land formation)

Client / Employer Government of the Macao Special Administrative Region
 Infrastructure Development Office

Service Design of Land Formation by CONSULASIA, LDA.

Investment MOP 250,000 Million

Contract Price MOP 3,980,000

Time Schedule March 2010 to November 2010

Description of the Project This reclamation project is located at the outer harbor of Macao near the “Ponte da Amizade” (Hac Sa Wan area), to be the main landing area of the HONG KONG - ZHUHAI - MACAO Bridge. This project is one the five reclamation projects which was agreed by China on December of 2009.

The main purpose of the 5 zones of reclamation is primarily to increase the total land area of Macao and to create a new zone for houses and other future developments (which includes houses, school, public facilities, recycling plant, and an exhibition center).

The total area of the whole reclamation project is approximately 1,380,000 m² which is planned to progress from south to north. The total length of the project is about 2400 meters with its height set to be +4.8 Mean Sea Level.
