

MACAO SCIENCE CENTER (supervisory service and project management)

Client / Employer Government of the Macao Special Administrative Region
Office for the Development of Infrastructures

Service Supervisory Service and Project Management provided by CONSULASIA, LDA in consortium with Tecproeng, Fase and CAA

Investment Approx. MOP 350 Million

Contract Price MOP 7.5 Million

Time Schedule January 2007 to December 2009

This project plays as one of Macao Governments' major project for 2007 and CONSULASIA has a key role on its construction as we were in charge for the project supervision and management.

The Macao Science Center is a multi-functional building mainly for educational purposes that will also serve as convention center and a tourist attraction. The Center will comprise physics laboratories, an exhibition hall, a multi-media studio, a science ground for students, an astronomy hall, and a multi-purpose conference room with a 500-seat auditorium, seminar rooms, and supporting amenities.

The science center is located on reclaimed land on the waterfront of Macao. It serves as an educational facility for young people in and around the region. Combined with a conference center, the science center includes 15 galleries, a planetarium, a multifunction hall and an observation deck with a 180 view of Taipa Island.
