

FOOTBRIDGE LINK BETWEEN MGM COTAI AND LIGHT RAIL TRANSIT COTAI EAST STATION (design)

Client MGM Macau

Service Design provided by CONSULASIA, LDA.A.

Investment MOP 23,000,000.00 (estimate)

Contract Price MOP 1,980,000.00

Time Schedule 1st Semester 2016

Descrição do Projecto

In order to make the connection between the new casino of the MGM Macau, located in Cotai, and the Macau Light Rail Transit Cotai East Station, CONSULASIA was invited to develop the execution project for the pedestrian overpass. The LRT Cotai East Station was previously projected by CONSULASIA for the Transportation Infrastructure Office.

The pedestrian flyover will be 30 meters long, closed with glass on the sides and air conditioned. It will be designed according to the Macau fire regulations for buildings.

The project will have two phases:

- Statutory Approval for submission public works;
- Implementation Project, which includes the preparation of drawings for construction.

The areas covered under this project are: Architecture, Foundations and Structure, Drainage, Fire Services, Electricity and Air Conditioning.

The new MGM COTAI will have 2,500 slot machines, 500 gaming tables and more than 1,600 hotel rooms. This new resort will be more than double the size of the company in Macau.
