

INTERBORDER INDUSTRIAL PARK (infrastructure design)

Client / Employer Government of the Macao Special Administrative Region
 Land, Public Works and Transport Bureau

Service Investment Infrastructure Design Works provided by CONSULASIA, LDA.
 Approx MOP 60 Million

Contract Price MOP 1,100,000

Time Schedule June 2004 to October 2004

Description of the Project The project involved the provision of Engineering Infrastructure (i.e. Road works, Drainage system, Landscaping and a Pumping station) design of the Inter-border industrial park in "Ilha Verde".

The main focus of the design was to establish and calculate future developments that may be constructed on the industrial estate. The 400,000 square-meter park is focused on textile and garment processing and export along with related sectors such as garment design, logistics and exhibitions, in order to create a fashion centre while promoting further Macao-Zhuhai cooperation.

The State Council-approved park is envisioned as a multifunctional industrial zone with beautiful surroundings and favorable policies.

The first phase covers 0.4 square kilometers, 0.29 square kilometers for the Zhuhai Section and 0.11 square kilometers for the Macao Section, on reclaimed seashore situated between Ilha Verde, Macao, and Wanzai, Zhuhai.

The project takes advantage of both Guangdong, which has a clear competitive edge in manufacturing, technology, human resources and labor costs, and Macao as an independent tariff zone and free port.
